

JT-BC350-RF

High Performance RGB Controller with RF Remote for use with 12v and 24v RGB LED Modules, Flexible Strip and Neon-Flex.

The controller has 37 built-in modes including static, skipping, smooth and fades. The selected Mode, Speed and Brightness is shown on the LED display.

In addition, unique Rotary Dials allow you to DIY your favourite colour by mixing the Red, Green and Blue and saving the result.

The unit has over-current and short-circuit protection and a power loss memory function.

Technical Specifications

| | |
