JT-CS168

Premium Quality Flexible LED Strip using the newest 2835 SMD LEDs, which consume similar power to standard 5050 LEDs, but produce 20% more light.

With 168 LEDs per metre, the strip is ideal for displays requiring an extra level of brightness. 24v operation delivers a constant current that ensures the brightness remains even along the entire run.

The strip can be cut very 7 LEDS (42mm) and comes with 3M tape on the reverse for easy application.
